

Holding Headaches at Bay

Bodywork Eases Migraines and Tension Headaches

Cathy Ulrich

"Do you get headaches?" I asked Cindy. She had come to see me for massage to address her neck and shoulder pain but hadn't mentioned headaches.

"Well, yes," she said. "I've always had headaches and, now that you mention it, they seem to be worse when my neck hurts." Cindy went on to say she suffered from them as often as 2-3 times a week and typically treated them with ibuprofen.

Like many Americans, Cindy suffers from chronic, frequent headaches. Her neck pain finally prompted her to seek help, but she was so used to the headaches, she thought they were something she simply had to live with.

MIGRAINES.

Migraine headaches occur when the blood vessels in the brain become dilated, usually due to a chemical reaction, such as food allergies or a stress response. They often start with visual disturbances and quickly develop into severe head pain accompanied by nausea, vomiting, dizziness, and sensitivity to light. They're usually felt on one side of the head, but can be on both sides. Migraines are often managed with medications and avoidance of foods known to trigger them, such as red wine, chocolate, aged cheese, and nuts. However, some bodywork techniques can also be effective in easing migraines or decreasing the frequency of these painful headaches.

TENSION HEADACHES.

Exaggerated by stress, tension headaches are related to poor posture, jaw problems (such as temporomandibular joint disorder, or TMJ), and neck pain. Many people describe a headache that starts at the base of the skull and then moves in an arc over the ears and behind

enough to live
a healthy
lifestyle.*

Freedom from chronic headaches is an option many Americans don't even realize is possible.

What Cindy didn't understand was that frequent headaches are not normal and, with a little proactive planning, there is something that can be done to manage and even prevent them.

Types of Headaches

Headaches come in many varieties. Following is a short list of the most common types.

Office Hours and Contact

Ohana Therapeutic Massage
218-263-1501

Winter Hours

Mon. thru Thurs. 9am-6pm

Friday 9am-2pm

Sat 2/11 and 2/25 9am-12pm

the eyes. Tension headaches are most often caused or exacerbated by poor posture, work station positions, and body mechanics, creating undue stress on the upper neck muscles.

MIXED HEADACHES.

The term mixed headache is used to describe a tension headache that leads to a migraine. Typically, the tension headache starts first and the chemicals produced from the pain of it create conditions for a migraine to develop. In people with patterns of mixed headaches, the best way to avoid the onset of a migraine is to treat the tension headache.

Bodywork Options

A treatment regimen that includes bodywork, attention to body position, and stress management can help prevent or greatly reduce the frequency of headaches, in turn reducing your reliance on medication and the need to avoid food triggers. There are many different bodywork techniques, each with specific approaches for treating headaches. Following is a short list of techniques often effective in treating recurring headaches.

SWEDISH MASSAGE.

A tension headache, by its very name, implies the presence of stress and tension. Swedish massage, on the other hand, promotes relaxation and relieves muscle tension. When muscles become tight due to stress or poor posture, they eventually adapt a chronically shortened state. Swedish massage teaches the body how to let go of muscle tension and resets muscle tone.

INTEGRATIVE BODYWORK.

Rolfing, Hellerwork, Structural Integration, and CORE are examples of the types of bodywork designed to improve posture and structural alignment. A primary cause of chronic headaches is poor posture, which produces tension in the neck and shoulders because the weight of the head is not properly balanced on top of the spine. Integrative bodywork can produce lasting postural change for greater ease of movement. By selectively freeing the soft tissues, integrative bodywork literally can change postural alignment and remove the stresses and strains on the muscles that cause headaches.

DEEP TISSUE THERAPIES.

The integrative therapies mentioned above, as well as neuromuscular therapy and myofascial release, use similar techniques to free connective tissue. A chronically tensed muscle tends to maintain that tension, even after the stressful event has passed. Deep tissue techniques free the connective tissue glue, creating a new way for the muscle to function.

REFLEXOLOGY.

Like acupuncture, reflexology works to move energy blockages in the body. By stimulating points on the feet that correspond to organs in the body, reflexologists can promote relaxation, reduce pain, and restore energy flow. Several scientific studies have shown that reflexology is a viable treatment for migraines, in some cases working as well as, or better than, medication--and without the side effects.

CRANIOSACRAL THERAPY.

Craniosacral therapy addresses the inherent, gentle, rhythmic movement of the bones in the skull and their effect on the fluid that surrounds, bathes, and cushions the brain and spinal cord and runs throughout the body. Cranial bones move in miniscule amounts as a response to the production and absorption of cranial fluid. With head trauma, whiplash injury, or even severe stress, cranial bone movement can be compromised, resulting in headaches, dizziness, ringing in the ears, or vision disturbances. This therapy restores the normal movement of the cranial bones and fluid.

By addressing the root of the problem, regularly scheduled bodywork sessions can greatly reduce headaches as well as your need for medication. Remember, headaches are not normal, and you don't have to live with them.

Reflexology has proven as, or more, effective than medication--without the many side effects.

The Art of Bathing

Simple Recipes to Soothe Mind and Body

From bubble baths to essential oils to Dead Sea salts, prepared bath products are designed to enhance a bathing experience, but they can be expensive. Instead of spending the extra money on special bath products, try one of these natural, simple bath recipes with ingredients you probably already have in your cupboard or refrigerator.

Epsom Salts

ADD 2 CUPS EPSOM SALTS TO BATH WATER.
Magnesium sulfate, or Epsom salts, has been used for centuries as a folk remedy, and research now confirms its numerous benefits. The second most abundant element in human cells and a crucial component for bone health, magnesium is also needed for muscle control, energy production, and the elimination of toxins. Magnesium eases stress, aids sleep, and improves concentration while reducing inflammation, joint pain, and muscle cramps. Sulfates help to flush toxins from the body, prevent or reduce headaches, and even improve brain function.

Most American diets are deficient in magnesium. However, one of the best ways to boost dietary intake is by bathing in Epsom salts, which are readily absorbed through the skin.

Milk

ADD 2-4 CUPS MILK OR BUTTERMILK TO BATH WATER.

Rich in calcium, protein, and vitamins, milk replenishes the skin, while lactic acid found in milk acts as a natural exfoliant. A member of the alpha hydroxy acid family, lactic acid breaks the glue-like bonds between the outer layer of dead skin cells. Soak in a milk bath for 20 minutes, then gently scrub skin with a loofah or washcloth.

Honey

ADD 1/4 CUP HONEY TO BATH WATER.

A fragrant, natural humectant, honey helps skin attract and retain moisture. Its antibacterial and anti-irritant properties make it an ideal cleansing and soothing additive to a warm bath.

Turn your home bath into a spa experience.

The Case for Chocolate

New Studies Show Health Benefits

It's not like we need a specific reason to eat chocolate, but it doesn't hurt that studies are finding increasing health benefits associated with the popular indulgence. While chocolate is high in sugar and saturated fat, it does contain chemical compounds with proven benefits, so enjoy--in moderation--and expect to reap some of these rewards.

Improved Heart Health

A study in the Archives of Internal Medicine found that women over 70 who ate chocolate at least once a week were 35 percent less likely to suffer from heart disease during the survey period. Researchers suspect that the flavonoids found in chocolate, which are known to reduce blood pressure, likely improve overall cardiovascular health.

Reduced Liver Strain

These same flavonoids in dark chocolate that help decrease blood pressure can also reduce post-meal abdominal blood pressure spikes that strain the liver by widening and relaxing blood cells. A Spanish study of patients with end-stage liver disease showed that dark chocolate helped reduce some of the risks associated with conditions like cirrhosis.

Safer Pregnancy

Dark chocolate has been shown to help pregnant women avoid preeclampsia--a significant complication where blood pressure spikes to dangerous levels--by nearly 40 percent when consumed five times a week. Dark chocolate is especially rich in theobromine, which relaxes muscles and dilates blood vessels. As an additional benefit, it also seems to

improve circulation in the placenta.

Increased Endurance

Research out of the University of California, San Diego, demonstrated that mice given epicatechin, a flavonoid found in dark chocolate, could run for 50 percent longer than those who only drank water. The mice also grew new capillaries and mitochondria in their muscles, changes that explain their enhanced endurance capacity. Unfortunately, perhaps, for chocolate lovers, is that researchers say just one-sixth of 1 ounce of chocolate each day is the ideal serving size to receive this benefit.

WeGiveBack February Honorees - Mental Healthcare Workers!!

In February we honor those who work in the mental healthcare field! We choose to honor with 25 - FREE 30 minute massage appointments. From February 13th - 25th, Mental Healthcare Workers can receive a FREE 30 minute massage. For more details or to schedule your free 30 minute massage, please call us at 218-263-1501.

Upcoming events:

Valentine's Shopping Expo - Friday February 3rd from 6pm-9pm and Saturday February 4th from 9am-6pm

Perrella Home Show - Saturday March 11th 10am-4pm

Ohana Therapeutic Massage

208 E Howard St
Hibbing, MN 55746

Member, Associated Bodywork & Massage Professionals
