## Making the Most of Your Massage

### How to Prolong the Benefits of Bodywork

Barbara Hey

A massage works in wonderful ways, easing stress and pain, calming the nervous system, increasing circulation, loosening tight muscles, stimulating internal organs, and enhancing skin. The multiplicity of physiological responses sends a simple, clear message to the mind: Massage feels good. Of course, you want to hold on to that just-had-a-massage feeling -- total body relaxation, muscles relaxed and at ease, and fluid movement restored -- for as long as possible.

But how long that bliss lasts depends on the state of your body. If you're suffering from chronic pain or recovering from injury, then it may take more sessions and perhaps different

### Massage Frequency

How often you receive massage depends on why you're seeking massage. In dealing with the general tension of everyday commutes, computer work, and time demands, a monthly massage may be enough to sustain you. On the other hand, if you're seeking massage for chronic pain, you may need regular treatments every week or two. Or if you're addressing an acute injury or dealing with high levels of stress, you may need more frequent sessions. Your situation will dictate the optimum time between treatments, and your practitioner will work with you to determine the best course of action.

The more often you receive massage, the more therapeutic it becomes.

modalities before optimal health is restored.

If massage is part of your regular health regimen, then it's more likely the effects will endure. In other words, the effects of massage are cumulative, like any healthy habit. The more often you get a massage, the greater and longer-lasting the benefits.

"You need to consider how you felt before the session and how you felt after, and then look at how long you maintain that," says Pieter Sommen, the chair of the eastern department in the Swedish Institute School of Massage Therapy in New York.

In general, experts say "regular" is preferable, but how regular depends on your situation. While daily massage would be delightful, practical considerations such as cost, time, and physical need likely determine the frequency of treatments. "It's best to maintain a schedule," says Eeris Kallil, CMT, a shiatsu instructor at the Boulder College of Massage Therapy in Colorado. "That way the body becomes conditioned and prepared for session at specific intervals."

## Maintenance

Whether you get a massage weekly, monthly, or just every once in a while, the following habits can maximize and extend the afterglow of treatment.

### WATER

One bit of advice you'll hear over and over again is to drink plenty of water after a massage. Bodywork -- no matter the particular modality -- releases toxins, such as lactic acid and carbonic acid, that need to be flushed from the body. Massage also promotes circulation, increasing blood flow and oxygen and stimulating the lymphatic system, which helps rid the body of pathogens. After-massage hydration supports these functions, helping to eliminate released impurities, sooner rather than later.

### STRETCHING

Another helpful habit is stretching between massages to maintain joint mobility, prevent muscles from tightening up again, and keeping the life energy flowing. This may mean doing yoga or whatever specific or full-body stretches suggested by your practitioner. After a shiatsu session, for example, your practitioner may recommend "makko-ho" stretches, a series of six exercises designed to keep energy circulating. "This series of stretches take anywhere from 5 to 10 minutes a day, but really help keep the chi flowing through the body," says Kallil.

### EXERCISE

Working out can also help maintain the benefits of massage, and this habit should be continually cultivated. However, if you're receiving massage therapy to help speed muscle strain recovery, you may need to ease up on the exercise for a while and give the body time to heal -- particularly if you're

recovering from a strenuous body-pummeling training regimen. "You don't want to over-work your body," says Kallil. That is, if running is taking a toll, try something more gentle and meditative such as swimming, walking, or tai chi.

### BODY AWARENESS

After a massage, respect how your body feels. If your body seems to ask for rest, give in to that demand. This may mean backing off the to-do list, taking it easy, moving slower, and perhaps doing less for a while. And don't allow yourself to get fatigued because it will undermine the effects of massage. Get sufficient sleep to allow the body to absorb the effects and regain vitality.

### DIET

Finally, since you've just rid the body of toxins, support the body's renewed state by adhering to a healthy diet rich in

fruits and vegetables, which will continue the detoxification process. Lay off the espresso and all adrenaline-challenges for a time -- which would short-circuit relaxation anyway -- and enjoy the calm.

The benefits of massage are many, including: increasing circulation, allowing the body to pump more oxygen and nutrients throughout the body; stimulating lymph flow and boosting immunity; relaxing overused or tight muscles; increasing joint mobility and range of motion; reducing recovery time after strenuous workouts or surgery; and relieving back pain and migraines, just to name a few.

After receiving a massage, clients feel rejuvenated, relaxed, and refreshed. By opting for a few lifestyle choices, you can extend these benefits and get the most out of your massage.

Stretching between massages helps maintain relaxed muscles, joint mobility, and energy flow.

# Managing Arthritis

## Exercise and Bodywork Keep Joint Pain at Bay

The word arthritis strikes fear in the hearts of older adults. It often signifies aging, pain, inactivity, and disability. However, new research shows moderate physical exercise can actually ease arthritis symptoms by decreasing pain and increasing a person's likelihood of living a normal life.

### Understanding Arthritis

The most common form of arthritis--osteoarthritis, or also known as degenerative arthritis--affects more than twenty million Americans. Osteoarthritis (literally meaning "bone-joint inflammation") is caused by wear and tear on joint surfaces and most frequently involves the hips, knees, lower back, neck, and fingers. More than half of people over sixty-five have some evidence of osteoarthritis on X-rays, although it doesn't always manifest as symptoms.

Many problems arise from a sedentary lifestyle. Joints lose flexibility and muscles lose strength, feeding the cycle

of pain, inactivity, and more pain.

### Exercise Offers Sweet Relief

Vigorous walking, swimming, and bicycling boost the release of powerful endorphins, the body's natural painkillers. When done four to five days a week, these aerobic activities improve general cardiovascular health and aid in weight management (obesity is the single biggest risk factor for osteoarthritis).

Strengthening and stretching exercises targeted at maintaining joint flexibility and muscle strength--especially for at-risk joints--slow the progression of degenerative arthritis. Yoga classes and moderate weight lifting programs are excellent ways to improve strength and flexibility. Bodywork can also provide relief.

If arthritis is slowing you down, get serious with your exercise plan. Consult your physician; work with a professional trainer, physical therapist, yoga instructor, or bodyworker; and start a

gentle, progressive exercise program. Your joints will reward you for it, and you'll free yourself from arthritic pain.

Stretching can slow degenerative arthritis.

---

# Foods to Boost Your Mood

Don't let your diet get you down. If you're looking for a quick pick-me-up that will boost your mood but go easy on your calorie count, consider these "superfoods" recommended by Mehmet Oz, MD, vice-chair and professor of surgery at Columbia University and contributor to Oprah.com.

#### KEFIR MILK

Try it if: you're looking to calm down. Made by fermenting more traditional milk with kefir grains, this drink is high in the amino acid tryptophan, which produces a relaxing effect on the nervous system. As a bonus, the drink also contains a healthy amount of B vitamins.

#### ASPARAGUS

Try it if: you're feeling low. This vegetable is loaded with folic acid,

which is good news for your mood, as low levels of the vitamin have been tied to depression. In fact, one 5.3-ounce serving contains 60 percent of your recommended daily folic acid allowance. Plus, asparagus is low in calories and contains no fat or cholesterol, so it won't ruin your diet.

#### ORANGES

Try it if: you're stressed out. Why? Vitamin C. This powerhouse nutrient can help support your immune system, skin, and more, but its stress-fighting powers come from its effect on your blood pressure. Studies have shown that consuming 500 milligrams of vitamin C daily can dramatically lower cardiovascular and stroke risk. One orange contains about 80 milligrams.

*If you want the  
rainbow, you've  
got to put up  
with the rain.*

As readers of our Newsletter, we like to give you the first peeks of the happenings at Ohana Therapeutic Massage. Check out below for the latest news!

WeGiveBack October Honorees!

This month we are happy to honor a group of people who do a job that most of us would rather avoid - crunching numbers. We're talking about Financial Workers! Bankers, billing/coding specialists, and financial advisors work long hours in front of a computer making sure all the numbers add up. From October 9th-21st, 25 Financial Workers can qualify to receive a FREE 30 minute massage at Ohana Therapeutic Massage! For more details or to schedule your free 30 minute massage, please call us at 218-263-1501.

October Events!

Saturday October 21st at 2pm-6pm - Level 1 Reiki Training

Saturday October 21st at 7pm-9pm - Birds and Barns Painting Class

Tuesday October 24th at 5:30pm - Myofascial Release Class

Call or visit our Facebook page to learn more!
